[www.nimos.nl](http://www.nimos.nl)

The MUG-H is a compact pedestrian operated weedbrushmachine with a hydraulic driven brush. Which does his work optimally because of the many adjustment possibilities.

The MUG-H weedbrushmachine has the benefit that it removes detritus as well as weeds, so removing the breeding ground in which new weeds will grow. It also gives a direct effect, as weeds are removed instead of dying and remain in-situ compared to other methods.

#### Typical Characteristics of the MUG-H:

- Hydraulic driven brush (Photo 1)
- Adjustable brush rotation. Left or right (Foto 2)
- Engine starts without running the brush. Extra safety
- Ultralow vibrationslevel. Engine mounted on vibrationsdampers (Photo 3)
- Diameter brush 650 mm (Photo 4)
- Brush works 20 cm outside the machine left or right (Photo 6)
- Hour counter for maintenance intervals, etc.(Foto 7)
- The height of the machine is central adjustable with one easy automatic pin. (Foto 8)

The vibrationlevel of the MUG-H is approved according EN ISO 5349

#### Optional available:

- Brushprotection (Photo A)
- Wheel mud guard (Photo B)
- Solid rubber tires (Standard for Mosquito-H) (Photo D)
- Various brushes (Photo D)
- Lift hook (Photo E)
- Brush speed adjustment (Photo F)

#### Technical information

Engine	Honda GX 200 - 4,1kw/ 5,5 HP
Diameter brush	650 mm (5 segments)
Brush	Adjustable in every direction
Dimensions LxBxH (mm)	1950 x 640 x 890(1060)
Drive	Hydraulic, stepless adjustable(option). Direction of rotation reversible
Weight	108 kg.
