

REMUL

PROFESSIONAL FLAIL MOWER

Del Morino

FARM & GARDEN EQUIPMENT

The flail mower has a horizontal rotor with "Y" blades driven by a 2-belts transmission, to achieve perfect grass cutting on large surfaces. Very effective even in the presence of very tall grass. Category 0 attachment ensures perfect tillage on uneven ground. Possibility to adjust the cutting height from 3 to 15 cm. Particularly used on parks, orchards, vineyards, meadows and fields.

Standard technical features • Frame in folded and painted steel sheet • Total width 130 cm • One horizontal rotor with interchangeable Y-blades • Floating category 0 attach to follow the irregularities of the ground • Two skids to adjust the cutting height • Adjustable cutting height from 3 to 15 cm • Rear roller •
